

## Resolution Signers

June 24<sup>th</sup>, 2016

### **We believe all people deserve access to high quality and affordable health care.**

We believe our health care system should spend our money on patient care, not administrative waste, and that patients should be free to choose their medical providers. Therefore, we support a privately delivered, publicly funded single payer system that assures universal coverage of all medically necessary services and contains costs by minimizing bureaucracy.

Please join us in supporting legislation that achieves these goals, such as federal legislation House Resolution 676 or our state legislation - The Minnesota Health Plan.
